RELEASE DECISION

! BLOCKED

Verification for verification-2-0

Required verification facts are missing or cannot be trusted.

Lifecycle

PLANNED

Open blockers1

No approved test cases are present in this report model.

Case execution remains blocked until the current case snapshot is approved and the report model is rebuilt.

READINESS

Lifecycle status

! PLANNED

Lifecycle readiness is derived from the current run history and gate decision.

# Six-domain status

Table 1. Six-domain verification status

| Domain    | Status    | Authority                                          |
|-----------|-----------|----------------------------------------------------|
| Facticity | ! BLOCKED | BLOCKED result derived from current case readings. |
| Static    | ! BLOCKED | BLOCKED result derived from current case readings. |
| Unit      | ! BLOCKED | BLOCKED result derived from current case readings. |
| Red team  | ! BLOCKED | BLOCKED result derived from current case readings. |
| E2E       | ! BLOCKED | BLOCKED result derived from current case readings. |
| Sensory   | ! BLOCKED | BLOCKED result derived from current case readings. |

Note. Domain status is derived from validated readings in the current report model.

REQUIRED ACTION

## Release blockers

1

01

verification-runtime: not-ready

Run the managed runtime setup command.

Artifact: runtime-status.json

**Next action:** Run specnav-verification-runtime-status; request specnav-verification-runtime-setup only when installation or repair is required.

## Report warnings

No report warnings are recorded in the validated report model.

**Projection boundary:** release and archive gates read validated JSON and JSONL artifacts, never this HTML file.

Generated 2026-08-02T00:00:00Z from validated Verification 2.0 artifacts.

## HTML is a projection, not the gate source of truth.
